CSE524 Jun 2nd, 2026

For Credit: Yes Attendance: Mandatory Would Take Again: Yes Grade: A Textbook: N/A

I had Prof. Rahmati as the supervisor for my MS research. it was a great experience for me working closely with him and his industry collaborators. We had weekly meetings, and he and his Ph.D. student were always available to give me feedback or work through an issue.

Rahmati covers a lot of material in this class. You have to read a research paper for every class, and you will be quizzed on it. The exams are tough but the curve is good. Happy I took this class.

Enjoyed the hands on experience. It was Prof. Rahmati's first time teaching the course and although there were some issues with homeworks I think the course was great.

Lectures were very diverse and covered lots of stuff. There were 5 homeworks in total. A couple of them were capture the flag style which I really enjoyed. Midterm and final were tough but the grades were cared so I did fine.

Rahmati isn't amazing but not terrible either. I like the style of his lectures, but at the same time, I wish his lectures were structured in a way such that it is easier to prepare for exams; I spent a decent amount of time going over lectures and still felt a bit unprepared for certain questions. ANNOYING homeworks(!!!!), hard class overall.

CSE331 Jan 4th, 2021

For Credit: Yes Attendance: Not Mandatory Would Take Again: Yes Grade: B+

Textbook: No Online Class: Yes

The lectures are very interesting and professor Rahmati covers a lot of topics in this class. I wish we would have covered some topics (e.g. machine learning security) in more detail. Exams were tough but Prof. grades fairly. I didn't do well on midterm, otherwise should have been able to get an A.

If code isn't required for a homework assignment, be prepared to write a whole novel depicting every second you spend working on the assignment in your report otherwise the likelihood of you getting full credit is slim to none.

The course covers a wide-range of material in security and is quite comprehensive. There are 5 homeworks that account for 60% of the grade, one midterm and the final. All homeworks are challenging and require coding. They are not something you can finish in a day. The exams are hard but are curved generously. Really happy with the course overall.

> 4 Papers a week. 2 for each class to review. > Final exam was below par in terms of the standard. It was more of like a textbook exam where you lyrheart things rather than problem-solving. > Paper review is a good thing as it makes one better critic. > Grading was too strict.
