He cannot teach at all! He cannot complete a sentence without saying "um a a a" in the middle of each sentence. Too boring. I could learn more by staring at a wall than by attending this class.

An introductory computer vision class should not require me to have a computer vision background or an extensive background in Calc 3 and 4. Im not sure what the prof does bc he off-loads ALL the work to his TA (grading, making ALL the homework assignments, administering midterms) AVOID THIS PROF AT ALL COSTS!!!!!! He doesn't care about teaching.

After several poorly designed homework, there came the final project. I sent a proposal and it got accepted by the assistants just to find out when the grades came that "The professor was not satisfied with the project you chose". Just to mention, he teaches anything ever done by any researcher. Get ready to scroll slides, A LOT.

Worst taught class I have ever taken. Professor gives a brief overview of numerous topics in the field, and then tests specifics about each one. The lecture slides are awful-impossible to study from, contain really ugly formulas, and the professor just rambles during lecture without following what's on slides. Assignments are hard with no help.

Contents are difficult but exams are easy. There will also be assignments and projects. But I learnt a lot from this class. So no regrets. The professor is an expert in his field and is fairly articulate.

The class is VERY interesting conceptually but the projects are impossible and very time-consuming!
